

## Rapid Deployment Video Systems / CBX-FORTY & CBX-ONE

### Proactive Prevention

Numerous studies have shown that when criminal activity is identified and addressed in a timely manner, it can greatly improve the quality of a neighborhood or community. Rapid deployment video systems have the potential to proactively prevent and/or reduce crime, identify criminal or disruptive activity, and enhance public safety and security. They have been successfully used by a variety of agencies and private businesses, such as government municipalities, police departments, public transportation, construction sites, universities, live events, and high crime locations and provide the ability to extend the coverage of existing video surveillance solutions in a given area

### Mobile Video Monitoring Where You Need it Most

Partnering with us will give you the opportunity to take advantage of our custom-branded **CBX Rapid Deployment Camera Systems**, which has proven its utility in protecting many major Houston events businesses, and municipalities. . There is no permanent installation or existing infrastructure needed, so our systems can be easily mounted on towers and light poles or placed on vehicles and trailers, and moved as needed, providing extra coverage and security. Our team will work with you to design the best features and solutions to meet your needs.

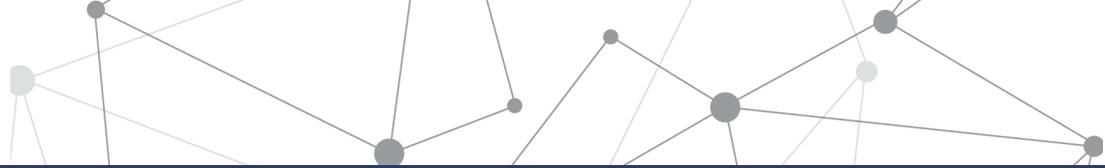

### TEKSYS CBX-FORTY

The Teksys CBX-40 Rapid Deployment Video Solution is designed to be able to operate on AC or Battery Power. Each unit will be able to run on 1 battery for a 2-day operation or 2 batteries for 4-day deployment. Comes with 128GB SD storage capacity for stable and reliable video capture.

### TEKSYS CBX-ONE
